Claim 1 is generic and allowable. Accordingly, the restriction requirement as to the encompassed species is hereby withdrawn and claims 6, 7, and 9, directed to the species of figures 5B –5D are no longer withdrawn from consideration since all of the claims to this species depend from or otherwise include each of the limitations of an allowed generic claim.

In view of the above noted withdrawal of the restriction requirement as to the linked species, applicant(s) are advised that if any claim(s) depending from or including all the limitations of the allowable generic linking claim(s) be presented in a continuation or divisional application, such claims may be subject to provisional statutory and/or nonstatutory double patenting rejections over the claims of the instant application. Once a restriction requirement is withdrawn, the provisions of 35 U.S.C. 121 are no longer applicable. See *In re Ziegler*, 44 F.2d 1211, 1215, 170 USPQ 129, 131-32 (CCPA 1971). See also MPEP § 804.01.

The following is an examiner's statement of reasons for allowance: The prior art of record alone or in combination fail to disclose an electrical module installation as claimed having particularly an electrical module with plural electrical connectors in a first pattern and electrical cables and a cable support structure positioned to overlies and permit viewing of the electrical module and the cable support structure having a polymeric member having cable receiving and retaining locations defined therein and a flexible retainer permitting movement of the cable support structure together with the plurality of cables located in the cable receiving locations relative to a mounting location while maintaining the plurality of cables oriented in the first pattern.
